

Maintenance

An Ounce of Prevention is Worth a Pound of Cure!

SINGULUS 
Smart Solutions to Drive the Future.

Maintenance

An Investment for the Future

The highest production levels require routine preventive machine maintenance, performed by experienced Service Engineers. Our experience of many years proves that regular routine maintenance is a cost-saving benefit to our customers.

Maintenance Kits

SINGULUS TECHNOLOGIES Customer Service provides specific maintenance offers for each machine type. We encourage all customers to develop a maintenance plan with us before the high season, to ensure production capacity without any avoidable issues and corresponding down-time production delays. SINGULUS can prepare a maintenance schedule specifically tailored to

meet your unique needs and budget. Contact your Account Manager today, and avoid costly production delays. We have Master Maintenance agreements with many of our customers, who tell us that this is one of the smartest investments they have ever made.

Maintenance Plus

Take advantage of Maintenance Plus! Buy a complete Maintenance Plus package for one system and we include service hours for a flat rate for one of our experienced Service Engineers.

Inspection Plus

SINGULUS will send an experienced Service Engineer to check your machine and

afterwards submit an offer which includes all parts, which have to be replaced. We will offer you a complete, custom-tailored package as a suggestion. Just ask for an offer!

Your Benefits

- _ optimized production levels
- _ cost-savings
- _ specific maintenance offers for each machine type
- _ ensure production capacity without any avoidable failures
- _ custom-tailored maintenance schedules
- _ no costly production delays
- _ no avoidable downtime of the system
- _ special conditions
